I don't really know if they were internal or not. The TRW is an internal group, and they passed comments to our HQ folks... maybe Gary too... not sure. You may have them in your records. I have no reason to believe they would not be shared. Regardless, Yes, these are the flavor from HQs standpoint. More specifically, they are focused on the RBA issue. I don't even think their too worried about the exposure factors mentioned in the first few comments. They are also not pushing the traditional cancer assessment vs the TDI anymore because the risks for dioxins/furans were higher for the non-cancer anyway.

I am available at 4 pm (my time) if you would like to call. I'm not in the office, so my cell is also the best bet: 940-395-5735

Phil

Thanks, Phil. Do you mean that these comments are internal, or something that I should have in our records already? And are these the flavor of the current concerns?

Tomorrow I have a lot of meetings (somebody has discovered Fridays as a meeting day). I have time at about 1030 AM your time, and 4 PM your time, and will be at my cell, below

9493910

Hi Jennifer,

I got a little break over the holidays, but not much. How 'bout you? I'll try to call you sometime tomorrow. As a heads up, I know our HQ folks would like to see a much better (more thorough) justification for the chosen RBA & ABA. The EPA TRW Bioavailability Committee provided some comments which should be addressed. I've attached a copy of their comments, which actually date back to review of the BHHRA.

Thanks!

Phil

Hi Phil-

I hope you had some sort of a break over the holidays and that this email finds you well. I wanted to follow up on the note below and to see if you have some time in the next couple of days to discuss the relative bioavailability adjustment factor used in the San Jacinto River Waste Pits human health risk assessment.

Do you have some availability this week? Let me know and I'll give you a call.

Thanks,

Jennifer

Phil,

Jennifer Sampson will be contacting you sometime to discuss the RBA factor for San Jacinto.

Regards,

Gary Miller
